MSA Engineering Consultants core design services include the traditional disciplines of, Mechanical, Plumbing, Electrical & Information Technology Systems design services. Our core market sectors include; Hospitality and Gaming, Education, Healthcare, Performing Arts, Sports Venues and Commercial market sectors. Since our firm's inception in 1978, MSA Engineering Consultants has successfully completed over 10,000 projects from 1,300 clients. Expertise, determination and five star customer service are the building blocks that allow MSA Engineering Consultants to transform new contacts into lifelong clients and friends.

What began in a small office above a bowling alley in Sparks, Nevada has grown into an industry leader. MSA Engineering Consultants is a necessary component for organizations seeking design consultation where form follows function; where the operational needs of the facility are significant and the forefront of design consideration.

In 1997 the Las Vegas office of MSA Engineering Consultants was established in a 5,000 SF second floor office east of Las Vegas Boulevard. Since then and a couple moves to larger offices, we have made our permanent home in a 24,000 SF ground up design which had afforded our firm an opportunity to embrace design elements and program spaces to optimize our office work environment.

In 2010 we established an office in the heart of Phoenix, Arizona to better serve our clients. We believe that to understand the markets you serve, it is essential that we live and work in that market. Being a part of the community that you work in is a key component to customer service and commitment.

Currently registered in over 40 states, MSA Engineering Consultants serves multiple geographic locations across the country. We provide a broad spectrum of design services for multiple vertical and geographic market sectors. We believe that our market diversity is a key strength of our firm that helps mitigate the impact of regional cyclical markets we serve. At MSA Engineering Consultants we pride ourselves on building long term relationships that stand the test of time.
